Summary

Full-stack software engineer seeking a role building production web applications. CS graduate with hands-on experience deploying React/TypeScript/Node.js apps on AWS, implementing CI/CD pipelines, and writing tested, maintainable code. Combines strong engineering fundamentals with applied knowledge in algorithms, data modeling, and cloud infrastructure.

Skills

Languages: TypeScript, JavaScript, Python, Java, SQL, C, R
Web & Backend: React, Node.js, Express, PostgreSQL, MongoDB, REST APIs, HTML/CSS
Cloud & DevOps: AWS (EC2, Route 53, SES, SNS), GitHub Actions, CI/CD, Docker, Linux, Jest, Cypress
Data & ML: Pandas, NumPy, Scikit-learn, Statistical Modeling, NLP
Tools: Git, Quarto, $\LaTeX$

Experience

City of San Luis Obispo, Information Technology Department Nov 2023 – Feb 2026
IT Helpdesk Assistant San Luis Obispo, CA

- Developed PowerShell and Python scripts to automate software licensing, installation, and imaging workflows for a 2-person helpdesk team supporting 500+ city employees.
- Resolved 2,000+ support tickets across a hybrid M365 environment; created a knowledge base of documented procedures to reduce repeat escalations.

Cuesta College Aug 2023 – Mar 2025
Undergraduate Researcher San Luis Obispo, CA

- Engineered Python programs using SymPy for symbolic computation to formally verify a proof connecting harmonic-number series to Riemann zeta functions.
- Designed reproducible computational pipelines; presented research at the National Conference of Undergraduate Research (NCUR).

San Luis Coastal Unified School District Jun 2022 – Present
Academic Advisor, Mock Trial San Luis Obispo, CA

- Designed scoring requirements and user workflows for a county-wide tournament platform used by organizers and coaches, replacing error-prone paper tabulation.
- Coach 20+ students annually in a nationally competitive program; analyze performance data to identify trends and adjust strategy.

Projects

Mock Scores – Full-Stack Tournament Scoring Platform Apr 2026

- Built React/TypeScript/Express/PostgreSQL app that replaced paper-based scoring for SLO County mock trial competitions, serving organizers and coaches with real-time results.
- Deployed on AWS (EC2, Route 53, SES, SNS); implemented CI/CD with GitHub Actions, Jest, and Cypress e2e tests ensuring automated deployment checks.

BoxFish – Algorithmic Game AI Aug 2025

- Implemented game-playing agents in Java using Alpha-Beta Pruning and Monte Carlo Tree Search for Dots and Boxes.
- Architected modular engine with parallel execution; benchmarked performance across board sizes with JUnit CI.

Business License Survival Analysis – Statistical Modeling Mar 2026

- Analyzed SLO business-license records using Python and R to identify predictors of closure risk, producing actionable insights for city economic planning.

Prostate Cancer Discriminant Analysis – Statistical ML Jun 2026

- Built Linear Discriminant Analysis model in R achieving 80% accuracy on clinical data; authored reproducible Quarto report documenting full methodology.

Education

California Polytechnic State University, San Luis Obispo Aug 2026
Bachelor of Science in Computer Science San Luis Obispo, CA
Relevant Coursework: Operating Systems, Algorithms, Database Systems, Software Engineering, Artificial Intelligence, Machine Learning, Natural Language Processing, Knowledge Discovery from Data

Certifications

- AWS Certified Cloud Practitioner (CLF-C02) – Aug 2026

Awards

- Eagle Scout, Boy Scouts of America – Sep 2019
